JNTUA

SKILLS

Ruby · Ruby on Rails · Python · RESTful APIs · PostgreSQL · RSpec · React.js · Git · JavaScript · GitHub · Tailwind CSS · API Development · AWS

PROJECTS

Konnectz IT (08/2021 - Present)
- **KonnectzIT** is a no-code automation platform that allows users to integrate and automate workflows between multiple applications without writing code. It enables seamless data transfer and task automation using a visual workflow builder, API integrations, and real-time execution.
- The platform supports various third-party applications, making it easy for businesses to streamline operations and improve efficiency.
- Technologies: Ruby on Rails, PostgreSQL, Sidekiq, React.js, JavaScript, RSpec, Capybara.
- API Integration and Authentication: HTTParty, Curl, Net/http, OAuth and JWT-based authentication.

Gift In Time
- Gift in Time is an app that makes thoughtful gifting effortless. Send personalized boutique gifts and handwritten cards on time, with a built-in calendar to track important occasions. No matter where you are, your recipient will receive a beautifully packaged gift, making considerate gifting simple and global.

AmpYourGood
- Amp Your Good is an app that helps people organize charity campaigns. It lets you create a campaign page to share with others, where people can donate by buying goods. The app then delivers those goods to the charity, making it easy to support good causes.
